

## Your Payment Gateway Integration Solution

**PayTrace's Application Programmer's Interface (API)** is an option with PayTrace Professional that allows you to integrate the power of PayTrace's Payment Gateway into proprietary or 3rd party software. Once integrated, your software application will be able to process electronic payments in real-time and securely store customer data. The API also includes an optional hosted secure checkout page.

### API Highlights

- Process Credit Card and Gift Card Transactions
- Process Level II and Level III Data
- Store Customer Profiles
- Process Recurring Payments
- Receive Real-Time Shipping Quotes
- Email Receipts
- Email Invoices with Payment Links
- Operating System and Platform Independent
- Detailed Integration Guide Available
- Integrations Samples Available in C++, PHP, VB, ASP, VB.NET, ColdFusion and Java
- Test Account Available for Testing
