

LET'S EXPLORE!

BRAIN BUILDERS

Encourage your child to be curious about the world around them. For example: What happens when you mix paint with water? Use a dropper to squeeze paint into a bowl of water. Explain what is happening. Asking your child questions about the world will increase their curiosity.

Science helps children understand the world around them. The change from day to night, the change of the seasons, how rain helps plants grow, why things fall to the ground when you drop them are all ways your child can see science in everyday life.

DECEMBER 2020

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
		1	2 Take It Outside! Use colorful chalk and trace shadows on the sidewalk.	3	4	5 Read Aloud: Read a book related to science. Encourage your child to draw a picture related to the story.
6	7 Make a telescope out of an empty paper towel tube. As a bonus, paint the tube!	8	9	10 Read Aloud: Read a book related to seasons. Make, draw or paint a picture of the season that your child chose.	11	12
13	14	15 Music Time! Tap a beat on different objects to produce a different sound. Encourage your child to repeat the beat.	16	17	18 Count It Out! Read a story to your child and count different items on the page.	19
20 Count It Out! Create snowmen from paint and cotton balls. Count your snow family!	21	22	23 Role play that it is snowing. Create snow with toilet tissue or cotton balls.	24	25	26
27 Encourage your child to pick a book. From the cover, conclude the theme of the book.	28	29	30 Sing Aloud: Make a silly song about winter.	31	LOOK AT THE WORLD THROUGH YOUR CHILD'S EYES.
